

## Mono interference filter

- For use with any mono coil
- Lightweight design
- Reduces radio interference
- May assist in reduction of electrical interference

## Installation

The filter is bi-directional and can be connected either way. It has been designed to be conveniently placed on the side of your control box using the supplied velcro strip.

Connect your coil connector to a socket on the filter. Attach the jumper cable to the other free socket, then connect the other end of the jumper cable to your control box's soil socket.
